TECNOLOGIA E DESIGN PER SUPERFICI RESISTENTI E BELLE

TECHNOLOGY AND DESIGN FOR RESISTANT AND BEAUTIFUL SURFACES

Con SKEMA trovi sempre il pavimento e il rivestimento per pareti che ti serve. L'azienda è specializzata in pavimenti flottanti dal 1992. Oggi l'offerta SKEMA comprende tutte le superfici "calde" come laminato, legno, Spc, ibridi e decking per esterno, oltre ai pannelli fonoassorbenti per pareti e soffitti. Da sempre la parola d'ordine è Innovazione e Design, per dare soluzioni pratiche, smart, belle e sostenibili.

With SKEMA you always find the floor and wall covering you need. The company has specialised in floating flooring since 1992. Today, the SKEMA offer includes all so-called warm surfaces such as wood, laminate, wood, Spc, hybrids and decking for outdoor, more over sound-absorbing panels for walls and false ceilings. The motto has always been Innovation and Design, to provide practical, smart, beautiful and sustainable solutions.

PAVIMENTI TECNICI

TECHNICAL FLOORINGS

I pavimenti tecnici rappresentano il cuore della proposta di Skema e continuano a essere la scelta migliore in molti contesti per le loro caratteristiche tecniche e il loro realismo. Ampia la scelta di decori, dall'effetto legno al materico, di formati, dalla doga al tiles. L'estetica è ricercata grazie al sincroporo, che riproduce fedelmente le venature del legno, e alla superficie opaca e altamente performante. I pavimenti tecnici sono antistatici e compatibili con il riscaldamento a pavimento. Salubri e sostenibili, sono una scelta eccellente.

Technical floors have been the core of Skema's offer and continue to be the best choice in many contexts for their technical characteristics and realistic appearance. There is a wide choice of patterns, from wood effect to material, and of formats, from planks to tiles. Aesthetics are sought after thanks to the syncropore technology, which faithfully reproduces the wood grain, and the matte, high-performance surface. Technical floors are antistatic and compatible with underfloor heating. Healthy and sustainable, they are an excellent choice.

- **Pavimenti fatti in legno.**
Floors made of wood.
- **Tantissimi decorativi legno o materici.**
Many wood or material decors.
- **Tanti formati, dalla doga alla spina di pesce.**
Many formats, from plank to herringbone.
- **Perfetti per la posa su pavimenti esistenti.**
Perfect for laying on existing floors.
- **Posa facile, rapida e la stanza è subito pronta.**
Laying is easy, quick and the room is immediately ready.

- **Ideali anche su impianti di riscaldamento a pavimento.**
Also ideal on radiant floor heating systems.
- **Pavimenti resistenti all'acqua.**
Floorings water-resistant.
- **Ideali per tutti gli spazi, residenziali e commerciali.**
Ideal for all spaces, residential and commercial.
- **Resistenti ai graffi**
Scratch resistant
- **Salubri e riciclabili**
Healthy and recyclable

LEGNO

WOOD FLOORINGS

Ricerca estetica e valorizzazione della materia prima: i pavimenti in legno celebrano la tradizione e l'artigianalità, nel rispetto dell'ambiente, come dimostrano le certificazioni d'origine. Alle plance di diverse dimensioni si affiancano le bellissime spine italiana ed ungheresi (45° e 60°).

Aesthetic research and enhancement of the raw material: wood flooring celebrates tradition and craftsmanship, and respects the environment, as proven by the certificates of origin. The beautiful Italian and Hungarian herringbones (45° and 60°) are added to the different sized boards.

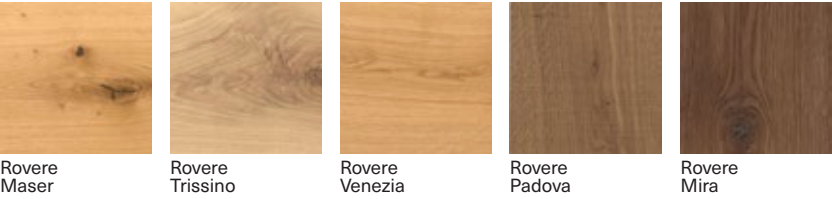

- **100% in vero legno**

GLI INGREDIENTI DI UNA RICETTA INNOVATIVA

THE INGREDIENTS OF AN INNOVATIVE RECIPE

Il WPC (Wood Polymer Composite) è un composto formato da fibre di legno e polietilene. Il suo punto di forza è la combinazione tra la resistenza e le proprietà estetiche del legno, con la lunga durata e la facilità di manutenzione del polietilene. Un composto a cui vengono aggiunti i pigmenti che conferiscono la colorazione e che Skema trasforma nel decking pratico e bello per rivestire le superfici esterne. Un esempio di come la tecnologia più innovativa semplifica la vita di tutti i giorni e migliora il benessere abitativo, anche negli spazi all'aperto.

WPC (Wood Polymer Composite) is a compound made of wood fibers and polyethylene. Its strength is the combination of resistance and aesthetic properties of wood, with the long life and easy maintenance of polyethylene. A compound which are added to the pigments that give the color and that Skema transforms into practical and beautiful decking to cover the external surfaces. An example of how the most innovative technology simplifies everyday life and improves well-being, even in outdoor spaces.

UN IMPEGNO CERTIFICATO

Oltre a migliorare la qualità estetica degli ambienti, i prodotti di Skema sono sicuri e rispettosi delle principali normative nazionali ed europee del settore. L'azienda è certificata UNI EN ISO 9001 per la qualità, relativamente alla progettazione, produzione e commercializzazione dei propri prodotti. La certificazione UNI EN ISO 14001 attesta la conformità di Skema ai requisiti del sistema di gestione ambientale. Molti prodotti selezionati da Skema rispettano i Criteri Minimi Ambientali (CAM), fondamentali per operare nel settore pubblico. Sono inoltre marcati CE in conformità al Regolamento UE n°305/2011 sui prodotti da costruzione, e certificati a bassa emissione di formaldeide e COV (Composti Organici Volatili). Le certificazioni FSC® e PEFC garantiscono l'uso di legno proveniente da foreste gestite in modo responsabile.

A CERTIFIED COMMITMENT

In addition to improving the aesthetic quality of rooms, Skema products are safe and comply with the main national and European standards in the sector. The company is UNI EN ISO 9001 certified for quality in the design, production and marketing of its products. UNI EN ISO 14001 certification attests Skema's compliance with environmental management system requirements. Many products selected by Skema comply with the Minimum Environmental Criteria (MEC), which are fundamental for operating in the public sector. They are also CE-marked in accordance with Regulation (EU) No. 305/2011 on construction products, and certified with low formaldehyde and VOC (Volatile Organic Compounds) emissions. FSC® and PEFC certifications guarantee the use of wood from responsibly managed forests.
